A detailed paper model template for a modified R2-D2 droid, created by CyberDrone. The template is a net of a cube, with various panels and details drawn on the faces. The faces are labeled with letters A through H, indicating where to fold and glue. The model is primarily green and white, with black details. A small 3D rendering of the completed model is shown in the top left corner. The artist's name, CyberDrone, and website are in the top right. A note at the bottom right says "Carefully cut out the shape on this page. Use a hobby knife to slit the white lines labeled with letters. Tape and glue are not necessary. Thicker paper is recommended."
