

1. MAKE THE HEAD, BODY AND LEGS OF THE SPIDER.

Cut out a large oval for the spider's body

and a smaller circle for the head.

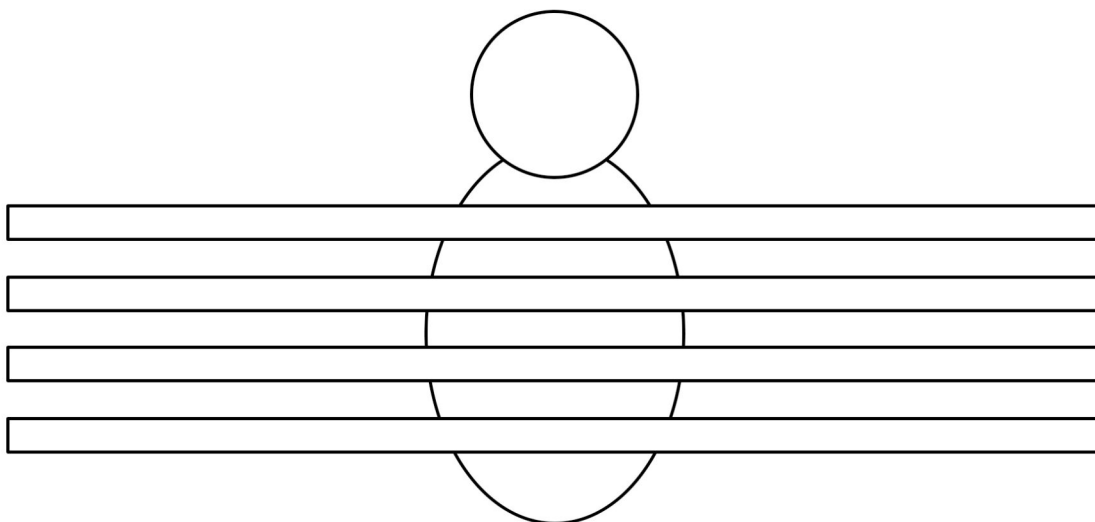

Cut 4 thin strips for the legs.

2. GLUE THE SPIDER.

Using glue, glue the head to the top of the oval body,

then glue four pairs of legs to the body.

3. FOLD THE LEGS OF THE SPIDER.

Flip the spider over so that the legs' glued sections are hidden underneath.

Fold down each of the eight legs.

4. ADD EYES.

Cut out and glue some eyes,

or draw the eyes with colored pencils.

You can glue more than two eyes - some species of spiders have up to 8 eyes!
